

25-year system warranty on copper cabling systems:

SCOPE:

- 25-year system warranty for compliance with the proper installation of the INFRALAN® cabling system.
- In the case of a warranty claim (proof by test reports and further information), the complained components will be checked and the defects rectified subsequently.
- INFRALAN® will costs if it is caused by the product. If the defect was caused by improper handling of the product, INFRALAN® will not carry any costs. The assumption of downtime or consequential costs by INFRALAN® is excluded.

REQUIREMENTS AND CONDITIONS:

- Use of INFRALAN® installation material (for all relevant components in the network)
- Installation of the cabling system by a certified INFRALAN® installer who has successfully passed the appropriate training (theory, practice, final exam)
- Signing of the contract for the installation object
- Compliance with the measurement limits required by the respective classification (permanent link)
- After installation, all measurement reports of the cabling route will be provided (permanent link)
- Clear assignment of the cabling distances to the respective labelling (measurement report)
- Certification only for cabling routes specified in the measurement report

CERTIFICATION PERIOD OF THE INFRALAN® PARTNER:

- Three years
- Completed projects will extend the certification
